September 12th 2011 ~ Monday Morning Minutes:

Griswold Chemical Pot Feeders **An old friend with several new twists**

Chemical feeders or "Pot-feeders" have adorned mechanical equipment rooms for decades. R.L. Deppmann appreciates the specification and purchase of the Griswold 2 and 5 gallon feeders. Today, I'll present a couple of the benefits both owners and installing contractors may enjoy when using the Griswold Feeders.

GRISWOLD series FB-5-SB-CS-Z five gallon, FB-2-SB-CS-Z two gallon, and FB-12-SB-CS-Z twelve gallon pot feeders offer the following benefits:

FOR OWNERS:

- Safety **aspect** of the low torque safety bar
- Optional cartridge filter

FOR CONTRACTORS:

- Safety **aspect** of the low torque safety bar
- An average install saving of ½ hour

FOR ENGINEERS:

- Safety **aspect** of the low torque safety bar
- Optional side stream cartridge filter
- 200 PSIG @ 250°F
- Word specifications and CAD detail

Next week we will show the options available and our recommendations.
