

# Detroit Medical Center – Cardiovascular Institute

## Location

Midtown Detroit,  
Michigan

## Engineer

Harley Ellis Devereaux  
Southfield, MI

## Installing Contractor

Ben Washington & Sons P&H  
Detroit, MI

## Construction Manager

Jenkins Skanska Joint Venture

## The RLD Project Team

Mike Kennedy  
Chris Lieder

## Challenge

DMC's Cardiovascular Institute & Harper Hospital Specialty Center needed the ability to provide high volumes of Domestic Hot Water (DHW) where building loads dramatically fluctuated. Temperature control was paramount and installation space was at a premium.

## Why R.L Deppmann?

The project engineer, **Harley Ellis Devereaux** and plumbing contractor, **Ben Washington and Sons**, chose R. L. Deppmann Company and **Cemline series SSH Water Heaters** to solve several issues on the project.

## Solution

By providing **Cemline SSH compact Semi Instantaneous packaged water heaters** on this project, the owner was able to satisfy large, fluctuating building DHW loads while maintaining accurate DHW temperatures. The owner was able to reduce water storage and save valuable space as well as standby energy losses.

"Compact packaged design of this product allowed for an efficient and quality installation insuring owner satisfaction."
