Troy, MI

## Installing Contractor

**Contrast Mechanical**

Macomb Twp, MI

## Construction Manager

**Frank Rewold and Son, Inc**

Rochester, MI

## The RLD Project Team

Rick Smiecinski

Gerry Potapa

## Challenge

United Shore Professional Baseball League wanted a new ballpark and the City of Utica, Michigan had a brownfield area that was the former town dump. The plumbing challenges included providing hot water in the park and elevator pit water removal. The timeline was very tight and there was no room for error. The opening day for the Utica Unicorns minor league team was set for May 30, 2016.

## Why R.L. Deppmann?

The project was fast-track and delivery was an important factor. The R. L. Deppmann commitment to local stock assured the team members that the equipment would be at the site when it was needed.

## Solution

Deppmann provided the **Laars UHE water heater** and the **Bell and Gossett sump and effluent pumps** from their inventory in plenty of time for opening day where the Utica Unicorns beat the Birmingham Bloomfield Beavers in front of a sellout crowd.

"Utica Ballpark was a unique project with the tight timeframe between construction and opening day. R.L. Deppmann delivered their products on time and helped eliminate any concerns about opening day!"

- David Conrad, Peter Basso Associates
